

# **Biostatistics: General Linear Models**

**Elizabeth Ann Housworth**

©2008 Elizabeth Ann Housworth

# List of Lectures

Lecture 1: Developing your common sense . . . . .	1
Lecture 2: Intuitive p-values . . . . .	5
Lecture 3: Various versions of the t-test . . . . .	11
Lecture 4: Assumptions . . . . .	17
Lecture 5: Log Transformations. . . . .	21
Lecture 6: Nonparametric procedures for comparing two distributions . . . . .	25
Lecture 7: Bootstrapping and Permutation tests. . . . .	31
Lecture 8: Paired Samples . . . . .	37
Lecture 9: Guide to comparing two samples . . . . .	39
Lecture 10: One-way ANOVA theory . . . . .	41
Lecture 11: One-way ANOVA examples . . . . .	43
Lecture 12: ANOVA alternatives . . . . .	45
Lecture 13: Contrasts and multiple comparisons after ANOVA . . . . .	47
Lecture 14: Random effects . . . . .	49
Lecture 15: . . . . .	51
