

## Self-Evaluation Form for Group Assignments

(due Monday, September 8)

I will assign students to groups based on responses to this self-evaluation form. If you have preferences for your other team members, you may also provide that information and I will consider it when making my assignments.

**Your Name:** \_\_\_\_\_

**Describe your strengths:** (for instance, you have substantial programming experience, you are a good organizer and task manager, you know a lot of mathematics, you have a good Capstone project idea already, etc...)

**Describe your weaknesses:** (for instance, you have no programming experience, you are disorganized, your English is poor, you hate this class already, you are a loner, etc...)

**Suggestions of names for your team along with justification:** (You may also request to opt out of team work, but then you must complete your own mini-projects and your own Capstone project by yourself and you will be graded equally against teams of 3-4 students who can divide the labor among their members. If there are too many requests, there will be an unmanageable number of projects to be presented at the end of the term and the requests will not be honored.)
